

2/17/94

Dear Richard,

In asking that a statement that the full research will be available for the record for history I did not think clearly. I do not want Wränd, McKnight or myself flooded with requests for copies from all who do not like what Posner did. And there are many!

Perhaps if it says that in the future copies will be available for scholars that might overcome this problem. Perhaps if there is no specification of where.

I'm not now clear in my own mind how best to get around what I did not anticipate, many time-consuming requests.

But whatever you think best on this will be fine.

Thanks,

I hope you cue me in on whatever you do to promote so I can help with it and not do anything in response to inquiries that might be what I should do.

I did write Wicker and got a response that can embarrass him. Closer to appearance I'll write him further.

I got no answer from Smbrose.

I have no addresses for the others.

Even the media have to go through Random House to reach Wise! He is, as I think I told you, doing a book that will compete with what Newman is working on.
