12/29/76

Dear Dick.

I've begin to get my personal files from the State Department, late and implicte but fantastic in the story they tell. If you have forgotten, I was one of atom them fired in 1947 without explanation, charges or bearings. I drew four of my scholarly collegues together, two were "argaret Head's proteges, got us a good law firm and become the first to beat a loyalty rap. A businer rap never was.

A misplification that will not indicate the dimensions of the story of which this is part is that the cops were making policy. It happened with Largel shortly thereafter, when Tuman's was not State's policy and State enunciated its cum, not Truman's, at the UK.

Trussa told Clark Cliffor, "They've sunk se."

You may remember I told you I've found another Seven Bays in May in CIA files. I have obtained, some of which I began to read when I was staying with you. The reality of this actuality is more frightening than the plot of Seven Bay.

I'ih never write either. I can t write what I want to. I may lock for others to do
it. In fact a Times man has been talking to me about a book about what I'we dome. I do
not know if meriossly.

But this really simister actuality of the silent overthrown of a system remains much on my mind, generally each morning when I shave, before I get to work. It did again this morning.

I do not know if State will give me more files now that I've made a case to it of their existence. The Orwellain practice was their's in 1947. The records do not even about the firing, the recommendation for firing, the fighting back successfully, etc. They show only that I resigned, as of the date I was fired. My resignation, the one I wrote, does not say that. No matter. They rewrote history.

That was a period in which there was residual anti-Semities in State, particularly in the cop minds so many of which same were attached to eastern European names. I had alsomys fought anti-Semities, particularly that by the Dies committee, and was strongly for the creation of the State of Israel. So there was more against me than that I was a democrat.

The FMI has produced not a single piece of paper on me and their alleged lag is long past. The GII is still stonewalling. There is no doubt I will have to see when I can. I hope this is closer. Which is why I write. Long ago both you and fred promised to send me all the legal work in "armey's case. I had seen I think the complaint and thought it good. The work done on that and any other cases of which you know can be important to me and 'im, who is still in sole practise and trying hard to work hisself out from under what the might did to him in ordering him to continue as Bay's unpaid attorney.

I do hope you can get a macretary to make and send these copies when there is time.

Some of what I've learned may amuse you. There never was any basis for questioning my loyalty. So they had to invent secors, which they did through the undereducated and backward, probably with a little intimidation and inference, too. Well, what made he dubtous character was having lots of books. Suspicion was added because I worked into the night and my typesriter could be heard at all hours. Some of the simple sick stuff. There is worse. Carbology began early for me, long before Kissinger protested it. In 19540 they were collecting my garbage and taking it away. The sail cover disclosed the hoursendous: I received Gazage Seldes' newsletter on the press and my wife the cooperature league's publication. (The was put on the subversive list for belonging to comparatives, two or three of them!) American Series, with soft brown shirts.

I am getting along well, by and large feel fine, have learned to apply what I learned from Dr. Segal and as of new from his alone, have reorganized my office and my life to cope with what it all means. In bad weather I use an exercycle, which is boring as hell but works the leg muscles which recirculate the blood. I can easily do 15 miles at 15 mph now. I do it to the also boring TV news. I've begun to deposit my records as an archive in a university system. The reception when I spent a week in lectures and seminars was fastastic. Conservative preachers interrupted prepared sermons for preises. They will try to find some may of arranging funding if the other needs can be not with the present money situation, with the understanding that if someone does find and wants the deposit elsewhere it will have to be. They have begun the mate and kinkt bolts part and were excited by the CIA and FBI papers gave them. Best to all, with hopes of a good year for you all.
