

Before that repast there is an appetizer.

This strange and pathetic man who regards himself as a rare genius can't get anything straight even when it is written out for him.

His tirades against me and others are in his chapter "Treason and the Smoke Screen." Treason, as he should have learned in law school is possible only when there is a declared state of war. But then if in getting his law degree he did not ~~even~~ even learn how to spell libel "libel" it is perhaps expecting too much to expect that he learned anything at all when he was in law school. The smoke screen is where his mind always is. It is self-generated.

This is where at the top of a single page he claims I did not ever tell him how that Department of Justice panel report # "disproves the Warren Report" and at the bottom of the same page quotes my letter as calling to his attention that the panel located the entry of the fatal hear shot four inches higher than the autopsy report on which the Commission's Report is based. That alone raises questions about the entire autopsy and the Commission's dependence on it (page 376).

That is also where he could not get the name of John P. ^BRoche right. He has it "ru"Riche."

After quoting me correctly as referring to what he was involved in as "silliness" and correctly also on the unfairness of what he was making up about Mary Ferrell, he writes this:

use first two ~~grafs~~ marked on 377 and after comment, the next graf.

a shadow of a doubt, and when you sent me down to the National Archives, I found proof of it. Hopefully, I will be able to get copies of that and prove it to the world. Harold, I was quoting one of *your* letters about 'Clark losing his cool.' So you are saying that you are really ignorant. That is the problem. You constantly reverse yourself just to criticize people."¹⁵

Discussing the research community, Weisberg wrote: "I hope this gives you an idea of what you are silly enough to immerse yourself in. Cut it out completely before you have real trouble from it. And from them. Those people lie without realizing they lie because what they say is what they want to be and they then believe it."¹⁶ He's got that right, as we sort our way through this psychiatric labyrinth, making our way to the funny farm. There was an implicit threat from Weisberg about the power of these people, which I resolved to test.

He wrote that "Mary Ferrell is as right wing as she seems to be. She has never been secret about this or pretended to anything else. She has never, to my knowledge, defended the Warren Report. She is not part of any plot of any kind. You will harm yourself greatly if you push that kind of notion because while there are many who do not agree with her beliefs, they will all resent this kind of baseless charge. Where she worked and for whom is irrelevant."

Weisberg's November 20, 1992, letter goes on to say, "You ask why Jim Garrison wound up flogging the CIA. He actually began that way. You do not understand Garrison: What he did not crib and enlarge upon he just made up. No substance to anything at all from him."

Harold repeatedly in his letters gloats on his turning on Garrison and destroying him when he thought it was justified. And, interestingly, who does he report all of his activity to, currying favor? H. L. Hunt and the Dallas Police, who received copies and reports of all of his communications to Dallas.

It was Harold who launched an all-out assault on the book *Farewell America*, in the United States in the 1960s. "There is intense interest in *Farewell America* because the ignoramuses pretending to be researchers like the crap that SDECE made up to disinform the critics, especially that Pink Panther, Garrison. My taking the manuscript to Garrison and my later preventing Garrison from going ape, as he'd planned and the CIA's French pal SDECE intended, over that stuff that Lamarre just made up. Garrison suggested the [English] title *Farewell America*. That zany actually believed it was the KGB leaking it to him! I broke up the last effort Lamarre made and he has been silent since. He was known as an oil specialist for French Intelligence in this country, under the name Lamarre. I do not know if it is his real name."¹⁷
