Mr. Milton Brener, Atty at law Tational bank of Commerce slag. New Orleans, La.

Dear Mr. Brener.

Your dislike of and fend with Jim Garrison is your own affeir. The bile with a comment, however, when you retail the most serious error about the assessmation of an American President and the frivolity termed on in-vestigation and the fiction pulmed off as a "heport", I feel comment is werranted. I therefore write to call one such error to your ettention.

The seventh section of the serialization, which has just reached me, conclude: "The Jurren Commission, after an extensive investigation, could find nothing to connect Oswald to the Camp Street address."

Break this down into the finest possible parts, and each part is brong.

The locatization itself mode absolutely no investigation. * never combed its files carefully on this point. The FRI made no investigation.

Mod you need the impropriate pages of my common in the made no investigation.

Mod you need the impropriate pages of my common in the made of the pertinent files are cited, you'd have known this. The Report itself is the secure of your claim. To save you has time of locking into your notes, I enclose a photocopy of page 408. This is an extra copy to which other documents are attrached. I suggest you will find them pertinent on the placetion of "extensive" and, what should be the test, thoroughness. The words of the Report so like yours are, "...extensive investigation are not able to comment against with that

Not a single witness was called on this point. There is not a sin la directive to the FDI on it that I have been able to undover. The FDI engaged in the most transperent trickery on just this point, pretending that the stare case for both and tDI harryquite are all fearent locations when they are one. (Report enclosed.) Even worse, Banister, who arranged the space for the sub-in Revolutionary Scuncil (organized, financed and directed by the Claratic funded it until Osweld went to New Orleans), was known to have arranged for this since by the two witnesses interviewed by the FDI. This information is in neither report.

In fact, not one of the witnesses who have placed Oswald at that a bilding was ever questioned by the formission or, to the best of my knowledge, by the FbI or the Secret Service. And Oswald was known to both to have weed this research that the surgestion in a real is still trying to suppress this proof, but I have it from another source and confirmation of it from the formula of the surgestion.

The Commission lawyer in cases of this aspect had much knowledge of that address and the people there he was careful to keep out of the "apart, of his interrogations - of everything. None of it is in any of the partinent files. He knew, for example, that the SI funded the group. He knew that Perrie and Arcacha were friends. And much more. If you'd like, let me know, and if I return to New Orleans I'll be glad to play a tape-recording of his attempt at explaining all this way for you. As a lawyer, you may be interested in his explanation about how the besis conclusion of the Report on conspiracy was written when the Report was on the press and the presses were about to role -with not even a typist, leave alone a member of the Commission, to check it.

granting.

In this connection I call to your attention the enclosed "report" on the really "extensive" investigation of Frank Bartes - all six lines of it. Do you suppose the FBI had to ask him if the CRC was an anti-Castro organization when our government organized it for that purpose and to supply the government-in-exile if the Bay of Pigs succeeded? Now it happens that Bartes has been a CIA employee, as he personally confirmed to me. It is no secret in New Orleans. It also happens that these revenchist Cubans used that address as long as Banister was alive. During the time Oswald was in New Orleans, Bartes was head of the CRC. His name is in Oswald's address book (but don't look for this in the "extensive investigation" recorded in the Warren Report) when the FBI transcribed this notebook for the Commission, it was careful to mask this appearance of Bartes' name.

Just how pro-Castro do you suppose Cawald was, soliciting expression of pro-Castro sympathy to be sent to the address used by these irretional and rough and irresponsible characters? He did just that, using that address on his literature.

As further evidence of the "extensiveness" and thoroughness and derendability of this investigation so impressive to you, it happens that part of the file on Oswald's loaflet is attached to the papers enclosed. The third paragraph of the first sheet uses the language employed in the Report, "Under the name Mawkin Osborne, Osmald ordered 1,000" handbills from the Jones Printing Co. Foth Jones Printing Co. witnesses said the opposite, that it was not Oswald. This is not only recorded in the FBI reports I will supply, should you desire them, but my personal interviews with them are even more specific in proving this was not Oswald.

There are literally dezens of witnesses on just these questions never interviewed by any representative of the government, and a fair number of those who were questioned who were not asked the right questions. Gowever, I believe the foregoing, if not all the relevant information I have, should be enough to satisfy you of the error of your writing and, I hope, to lead you to correct the book before it is published, if not to ask the paper to set the record straight.

Let me add this, which might interest you. Twice in Movember 1967, your client, Layton Martens, asked me to intercede with Garrison for him to change his plea. The first time I told him I would not talk with aim without your approval. When he said the second time that you did not approve, I told him he was unfair to you. I felt, however, that I had to report the indident to Garrison. He refused this success, saying he would not see Martens except in your presence and with your assent.

Sincerely.
