TO: LOUIS IVON ANVESTIGATOR
FROM: LYNN LOISEL, INVESTIGATOR
RE: SMITH INVESTIGATION

On January 4, 1967, Lynn Loisel received information about the activities of one Dave Ferrie from a confidential source.

This source remembers back around in 1961 or 1962 Dave Ferrie was trying to buy a DC 3 Airplane for $\$ 35,000$ to $\$ 45,000$ for the purpose of running guns to Guba. He was also supposed to have three large staches of guns hidden around the city that he had to deliver to Cuba. Also at one time he went to the source's house with a truckload of hand grenades and brought two of them to the source's apartment. Once in the apartment, he kept tossing them around and the source told him to take the grenades and leave.

The source went on to state that Ferrie was arrested by Deputy Sheriff Joe Battaglia who stafed that Ferrie had a
 number of guns in his residence ${ }_{\Lambda}$ a lot of doctor equipment, such as, blood pressure apparatus, stethoscope, etc., and had two minature submarines in his basement that he was building. When asked what they were for he stated that he would send supplies to Cuba in them.

The source also told of a conference he had with a woman whose son was in the Boy scouts. (?) It seems as though Ferrie went to give a lecture at a Boy Scout meeting or private school and the woman said he drove up on his motorcycle, his clothes were all disarranged and he looked dirty. She said she Eidn't like his attitude anê he "z-きるad lenguage.
