The CIA and KGB defectors; FBI 105-82555-894

Impossible as it may seem, there is at lwast one other KGB defectors who is at least as crazy ad Golitsyn and the CIA took him as seriously as it did Golitsyn.

I note that the FBI copied this record off center to eliminate the duplicate filings.

This record was sat on by the CIA for clearance as a referral until 9/23/88. The FBI
then sat on it for disclosure to me at least and possibly to others until 5/11/92.

From the covering memo the source cannot be Golitsyn. The source defected 10 years before the assassination. Golitsyn did not defet until 1961.

It is also impossible to believe that anyone could be as close to 100% wrong about everything, still be trusted by the CIA, and that it would forward this rubbish to any agency, especially to the FBI. Helms was then Deputy Director, Plans, so he did it:

Hiems actually accredits this insanity. Note beginning middle 1.

If the CIA could pay any attention at all to this maniac, what does it say about what it does with what other guff it got from the insane defectors?

I think this is, among other things, a remarkable self-Oindictment by the CIA.

This is not a new disclosure by the CIA, despite its sitting on it for so long.

This is not a new disclosure by the CIA, despite its sitting on it for so long.

The was included in one of the earliest of its releases, I think the second release.

It is pre-assassination information on Oswald and was not included in what tates the real the Rei could this record off center be all to the could the Senate is their complete file of pre-assassination information, as I recall.

If one is to look for a CIA motive in passing on absolute irrationality one should also consider the nature of the questions it drafted to be asked of the Soviet government.

They were included in the same early releases are could be asked.

Those questions were so offensive, so certain to antagonize the USOR government, even State objected to them. In being designed to offend their design also can be said to have visualized turning cooperation off, as such an insulting set of questions was certain to do. In the end, only a few questions were asked and no or virtually no documentation was requested. Nosenko told the FBI the KGB suspected Oswald was a sleeper or agent in place. Coinciding with the CIA's receipt of that FBI report its treatment of Nosenko changed from princely to utterly inhuman and it even considered means of killing him.

Or, if one wants to be suspicious; that is not difficult at all.
