

1/8/69

Dear Dave,

Your four brown-envelopes mailings, two small dated 1/4 today and two larger ones Monday, helpful, appreciated.

There are small ways in which you can simplify a few minor things for me. When you go to the trouble (which I appreciate) of typing a newspaper story, instead of following it line for line on narrow paper, please use regular size. This makes it easier for me to file and keep, especially since I have a continuing problem with file space.

And when as you did with LAR you cite a standard source, like Ulrich, could you please give the year?

As you will see from the enclosed, that is of some interest to me, for it seems that I had a file on the man. The enclosed is little more than a souvenir for you, but I thought perhaps you'd like it. It leaves me with a little more of a mystery than before, however.

To answer your questions: The four men of whom we have addresses do not fit the Miami-States Right plot. I have that in full detail in my unpublished COUP D'ETAT. This does not mean it could not have the same inspiration.

2) Not necessarily is the CIA involved with the plan to use plastic. That is what was used at the Birmingham church. It seems to be less scarce than society could desire.

3) Any such report can be of a phoney. However, these are such monstrous people, dedicated and believing themselves right, I am inclined to believe they may well have had the intent.

4) I doubt any connection with the Shaw decision. These people just hate the Supreme Court. They'd probably hate Shaw, too, for from the reports he is without racial prejudice.

Again, my hurried thanks.
