

VERY CONFIDENTIAL TO PAUL and very only 0;20/70 mw

I, not Kelley, terminated out meeting. It had already run so long there remained insufficient time to file the clothing/pictures suit, which Jim Lesar is to do for me today. I think he did not in any way attempt to deceive me. He also told me little and I did not pry. We just talked, in confidence, about most of the things. Those things I disclosed to him, in no case in full but in every case in sufficient detail to generate interest if any is likely I'll try and recall and list below. I would say that my reception was friendly, especially considering that I had no appointment. I went there on impulse, having picked the Archives letter up at the post office on the way to Washington. I was at SS from 9:15 until 1:30.

Missing X-rays. I described them to him and told him, as is true, that the Kellerman receipts put me in a position to establish that he did not get them.

Missing pictures: include all of the front. (He really seemed to be unaware of both. He was also unaware that the X-rays had been burned. They were not when last he saw them. He did show them to the staff, not the Members, and was unaware that Warren had ordered Rankin to have a Member and Overholser examine the back pictures-which I explained to him, as I did those of the clothing and why I'm suing for them. This was prior to the autopsy doctors' testimony, included them, and was in preparation of their testimony. I also told him of 399 fragmentation and some of the proofs of perjury.)

Geraci-Bringuer-O'Sullivan - the essence.

Ferrie and Ferrie-O'Sullivan - the essence, including (as above) editing of testimony, the CAP records (and the FBI's avoidance of).

Arncacha-Ferrie-544-Bartes-Martens-CIA, pre-assassination investigations withheld from Commission - the essence, including emphasis on FBI withholding and character of investigation.

Literature printing and distribution- included evidence of third man, that not LHO got the Handbill, the nature of my evidence identifying who did (not his name) and of the FBI raw reports as distinguished from summary. And my knowledge of how fast the SS was turned off on this, by FBI. We spent most of the time on N.O., not JG, who he never mentioned and I did but twice, in passing. Indications of other LHO activity not in WR (the one name I gave him Ampolsk, seemed strange to him and I take it it was). He seemed to know Wall but not deB.

In telling him of the kidnapping of Geraci, etc., I mentioned the girl's name. He did not ask me to identify her and, when we discussed Philip's impressions of what he was asked about, K's reaction could be taken to be a reflection that he did know about her. This is merely my impression. When I was telling him what the Geracis had told me of Philip's seduction by Mario, K said that whole thing was a mess. Whether he was referring to this or the Shaw homosexuality, etc., I did not ask. I tried to avoid asking anything.

There is more but I've no time for it. Got Gary's card from the general store and would like to know that Paul has been getting what I've been sending.
