Dear David:

I appreciate your support and interest in Double Cross. Your concern and enthusiasm to find out the truth is what America needs. I have often talked about George Bush, that is, CIA Director, he was in a position to at least find out what happened. His early relationships with Texas Oil lead me to wonder if he knows more about it all than he admits. My uncle never talked much about the "military industrial complex" so I can't further your question. Thanks again.
