is some sort of
Federal Spook yet
as he told me I
should "realize" that
he "helps out federal
agencies now and then"

My fears revolve
around the nature
of his present job
and if he is really
a spook and if
others knew, he would
be in for real trouble
from blacks.

Dear Jim,

I've been away on a long and rather successful trip, hence the delay in answering your 11/18.

The picture identified as that of an ONI man seems familiar, but I can't place it. Probably looks like someone else. Is that a hearing aid or an earphone?

C's conduct is consistent with his being some kind of speek still. However, I suggest you really have nothing to fear. Of the things you attributed to him, can you recall anything more on "Davies" besides the name? Was it Davies or Davis, if you recall or could tell on hearing?

I have done nothing to learn C's identity, but knowing his address (did you forget that)), it would be a cinch with a little effort it is not now worth.

There is always the chance that EM will say what I do not know, so I hope you are keeping full notes. He wound up in a liason role, too, don't forget.

You are probably correct in thinking that C could be in danger from black militants if ⁱⁿ a continuing federal or local police function. But I will not do anything to him.

Hope you do clear the scholastic work and can write further. Good luck with it, a job, and a good holiday.

Sincerely,
