Dear Keren and Ross,

Thanks for the interesting Luie story from the Mismi Berald.

One other thing of interest is the Cuben Power story. There has been nothing in the papers here since the indictment and the arrests. If anything appears, do not make a special mailing of it, but keep it until you do mail a mething. I have a continuing interest in that, but now I must concentrate on preparations for the heatriel, and for returning to New Orleans prior to it.

Indications are the Subans have enough morey, for they have also engaged a May Orl and lawyer to conduct investigations there.

At the moment, one particular Tuban holds additional interest. He has the name of one indicted but I think is not the same guy. The name is Jose Morejon. That, apparently, is not an uncommon name. The one in whom I am particular interested has the astronymic Conzelez, the one in the trial, Disz. Is there a Jose Morejon Conzeles listed in the atomi phone book? Teanwhile, if you see anything about ony Jose Morejon, I'd be interested.

Thanks for your good help, both of you. Hope you get the job: And have a real good holiday!

Sincerely,

Harold disberg
