

Dear Earl,

12/13/78

Unless we get a fast repair on our copier on which the drum has suddenly gone bad the copies I'll enclose will not be the best.

I went over my file of selections relating to Mexico and selected more than the single record of which I told you today. That is #89-43-1273, dated 11/29/63.

I did not make a separate file of airline checks but I do recall that they were checked and there was no passenger for Dallas who could have been Oswald.

The FBI did check these things out carefully.

I probably have copies of the ticket, etc. by now but haven't had time to go through those records.

I have some Mexico-material appeals with the FBI and the CIA, all overdue. Not able to file suits to get them now.

I have no records indicating any error in this record but you might want to check with Mary on that. I'm also including a memo I sent someone else with copies of the Commission's printed stuff.

In haste,

Various DL copies from what I got under 78-0322

Mostly bus return to US
