JL- added comment on Goulden/Washingtonian HW 2/3/75

Mothing could be more inconcintent with west Goulden prote than what he told/asked me when he was here and had questioned as about my background and experience. I'd forgotten it until stacking/hearing John Denn at Charlottenville an early a.m. We a few minutes ago.

The part of Dean's speech GRS aired had him torrow, how he comprovided everything

just to got ahead, to please and thereby become a "success."

He is hundled by the meer. Program Bureau, Sesten, Seb Walker, to whom Dick Gregory introduced as about 1969 (where they seemed to like and want me but told me that Lane had incisted that his was an exclusive contract).

It occured to no that if there is a counterpoise to Dean, I am it.

It then came back that Coulden asked or told no that I should write my autobiography.

I told him I don't have that kind of ego, don't have time because there is other work that I think has significance, and haven't even made notes for a journal of any kind until recently and then only infrequently.

Gaulden persisted that it should be done (which is not so different from the oral, histories in which Wrone is interested) and said he had a writer friend to whom he'd introduce see, I've forgother the same but the tapes should have all of this.

I can't reconcile this and that he wrote, so I presume he wrote for a purpose or for a mentar?
