Nr. Empry Brown 82 Squankum Rd. Howell, N.J. 07731

Dear Emery.

Many thanks for your mailing of 1/17. It may holp.

As perhaps I can with your Kelley 1/5, yours to bim of 12/6.

I filed the suit. My filing was all-inclusive. Therefore, anyone getting anything I didn't involves the fillin a violation. Not impossible, but with the case under appeal and this a central legal issue.

a) they'd be insene and box

b) it is urgent that I have it.

One question is compliance. We alleged there had been less thanks compliance in their (ansuthorized) regriting of my complaint following request.

What I have heard is that Michols had Quinn go over that Michols got following my request.

What you may have gotten that I didn't is another satter which Jim Legar will handle. I came down with a lingering phisbitis condition and can't keep up todate.

If you have not spelled this out in the past (in which event Jim has it) please do it now. I can't begin to remember all these details and complexities as I used to and I stay tired because treatments consists of my pushing myself walking until I am pooped.

While the time for oral arguments before the appeals court has not come yet, Jis is also enormously overworked and has no staff or assistance. We got a brief respite on the best of possible days, an icy one. Another suits the calendar call of which has set for tomorrow has been postponed to 2/5. But he has to prepare for the day appeal oral arguments on 2/3 in Cincinnati. Plus federal district court appearances in two of my suits already filed.

But if we can show the appeals court that the PBI gave anyone snything it did not give me it could make a vest difference and might even prevent the regriting of the law, which was started with this suit and a fink judge. As you saw in Post Mortem.

Jim has copies of all the scientific literature I've obtained.

However, what we still lack and could be of great value is a text-book statements describing how each test is properly conducted, how recorded, how translated in what is meaningful to a non-expert. It need not be in originalistics, if that would be best. The college students I have asked have not come up with it. If you can't, can you ask Guinn, without using my name, which would trigger Michols, with whom I have broken all contact?

Again thanks,
