9/23/67

Dear Mr. Hocker,

Thanks for your kind letter of 9/26.

Manchester's work is of historic inaccuracy, as you will see when I have finished the "Whitewash" series. One will be on that because I regard it as essential to public understanding.

Manchester proved nothing. He does not even know if the unnamed people to whom he spoke can establish that these were the genuine autopsy films. Further, it is not possible for any pictures of any kind to "prove" the single-bullet theory. At most they can suggest the possibility, and here other things obtain. The single-bullet theory has and is a desperate hoax. The book I am now working on will end that fiction once and for all. It is already written. I call it **POST MORTEM**.

I have never seen the pictures and always said to be shown of the incident simply because they are illegally suppressed and I have been denied access to them. I'll print this correspondence in **POST MORTEM** also. I think you will find all you'll want to know to satisfy you when I publish this book. I'll have about 300 pages of one-secret accounts all relating this in it.

Thanks for taking the time to write. Wish I could take time from writing to answer at greater length.

Sincerely,

Harold Weisberg

Dear Mr Weisberg:

I am deeply interested in President Kennedy's Assassination, & have read every Book that is out regarding the Warren Commission's Report. I found in all honesty that your 2 Books White Wash 1-2 are the Best and most sensible. I cannot and never will believe one man murdered the President. I would like to ask you if you have read William Manchester's Death of a President? Well on Pages 156-157 he discusses about the shots that hit both men. Below in small print he talks about the X Ray pictures which he proves went thru the president and into Governor Connolly.

What I would like to know is  
what do you think of this  
(the X Ray pictures he talks about  
in his book) and your own  
belief in regards to the X Ray  
pictures, last, have you ever  
saw the X ray pictures yourself?  
I thank you for taking the  
time to read my letter, I hope  
you can reply.

Sincerely

Charles Hocker
