

August 20, 1999
WEISBERG 2-2-2-2-2

It is obvious that Lancer picked up ~~the~~ ASK reins and found another way to make money off the event. it ~~isn't~~ also obvious that they know little about the whole affair. Lancer was quite proud of getting a Kennedy relative, Kerry McCarthy, to appear on the program - which contributed nil!! But, it did fool A LOT OF PEOPLE.

I am amazed at all you had on your ~~plate~~ that you could still take ~~on~~ the JFK case so thoroughly. Your attention to detail has been especially amazing!! For example you caught the fact that the Z film was shot at slow motion instead of normal. At that time I had a similar Revere camera I had in Korea. Like the Bell and Howell 'Executive' Model 414 PD, it, too, had 3 settings: normal (16 frames ps), individual still pictures and slow motion (24 frames ps). I often shot things at slow motion, especially in Korea, when I thought the extra frames would be important for events that I could never catch again. The difference between 16 and 24 frames ps change things considerably!!!

I am most bothered in reviewing printed documents about the cowardly way in which somebody (or plural) responded to JFK!!!!

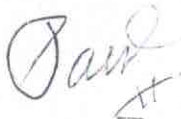

But, anger or no other emotion can correct what has transpired!!

I know we are all better for the time and effort you have put into this case!!!!

My very best of everything to you and ~~all~~ and I hope and pray for your days ahead!

Best,

Paul Haller

Once again, I apologize for my lousey typing. I have blamed it mostly on the fact that my fingers cannot keep up with my thoughts. the letters are wearing off the keyboard and I type by sight as well. Recently, the Discovery Channel had on a show about the Secret Service and noted that ~~these~~ guys are so well trained that they react like lightning!!!! Haller

At Lancer99, I hope to come up with the linchpin for my manuscript which I cannot find. I know I misfiled it to protect it!!!! I hope that's the answer!!!!
