## Dear Harold;

By Georges:! We missed a beaut (or perhaps a brute Ever since the stow lined up in the Caribbean, it had its sights on the Gulf. It always came out of its quadrant below the middle of the west side. As it drew closer, I found $\lambda\left[\begin{array}{l}\text { best tool was a barometer and one }\end{array}\right.$ could even track the wobble of the eye (now called the 'core") as it moved over cuba. Reviewing data from afar, a crisis appefared to be forming once the eye moved off Cuba and into the Straits of Florida, over warm water: the storm tried to regenerate and continue its westward movement and Coriolis was becoming apparent which would drive it straight up the peninsula and into my backyard!:! The storms own forces prevailed (thankfully) and the Gulf got its own hurricane. Here we got a few rain bursts and a few modes $\ddagger$ wind gusts.
 that there is no such word as "hefnnert" and women seem to be the new experts on all hurricane subjects. Also one assistant diredtor of the storm center had no broadcast training and talked as though he had a mouthful of frozen marshmallows:! They tossed around Doppler without ever explaining why it was "the final word!" The roving reporters all tried to one-upsman the anchor who tried to onewupsman the central control expert. The best was a rover who found a tree in the middle of a street. He got Very excited how it nearly reached the intersection with its fronds and thee root end was a ball of dirt with roots sticking into the air. He had his cameraman pan the thing and bleated on-and-on about how big it was etc. Finally he noted a hardhat about to attack it with a chainsaw and he said, "Sir, can you tell us what went on here??" And the guy, showing utmost mercy, said, "The wind blew the tree down!" The anchor then went into a long spiel about the different root systems of different trees, never explaing that a palm is a member of the grass family and in days blades will grow out of the ball of earth at the root end and the cycle will continue as it has for millions of years. It was bad where it hit!:!

I can't think about posner a or Mailer without getting queasy and feel badly for the field of journalism! You 200,000 words on Mailer's "stuff" is a lot of material. He sure tries to establish with the reader that both Lee and Marina were deviates, and he dug out the Soviet documents to "prove" it!!

If I run across a copy of Wilder's BRIDGE, I will grate it for you. It does semm a neat way to answer my grandnephew's question, "Whit doesn't someone do a book kids can understand??"

I just received the news that ARRB will wind up on September 29. They never addressed my points even though I wrote them 4 times and Mary Ferrell did, too:! When they convened at the Earle Cabell Building in Dallas, November 18, 1994, I expected to be called as Gary Aguilar and Beverly @liver were. BUT, they said they never got letter!: Well, even though truth is the objective of all who is to say what people can see and cannot:!:

Your work WHORING WITH HISTORY needs to be published. Only the bad stuff gets into print. Seems like the "experts" and 'authorities' ar pushing along the garbage!!
A Glad you found a typist and BRIDGE OF S\&刃 LUIS REY goes back a long mwnnananannnnnnnnnonnnnnnnnnnnnnnnnnnnnain $\approx$ paxhnnnnnnnnanan
way. I think I read where Wilder was one of the artists at at least one of JFK's get-togethers at the White House!! Small world!!

I've sent an ad off to a northern NY newspaper to sell my condo. That's all that's holding me up from moving to Brandon (near Tampa). I was once feet to move to Ireland with my son, but, he wised up and figured he could do for himself what others wanted him to do for them. He and his wife have a nice little computer business going in Brandon. Not only can help out, but, can be near my new grandson who will be one in November!!! I want to buy a wee farm for the boy tc learn that stuff - an orchard (citrus) and garden things. My son found 101 $\frac{1}{4}$ acres with established orchard and a double mobile home. The hurricane experts insist one get out of those places at once:!! Price was tight ( $\$ 76,000$ ) and the development seems to be headed that way: All I can do is west it out:!

Best regards and hope all is improving for you both: Best,

Paul H.

P.S. The four storms following Georges all got hooked by Coriolis!!

September 30, 1998
```

Dear Harold,
A friend of mine pulled this list off the web for me. Shades of
Penn Jones!!! Is it coincidence?? Nixon headed up Group 54-12 and my zip code ends with 5412:! Coincidence?? or l???

A psychologifist has come forward who said 'they should have known the President and Monica would have problems. When Bill was a boy, he was sent to a ranch for the stymmer. When he watt to town, he bumped into another kid who had been sent to another ranch. naturally they compared notes and Bill said their ranch's bull was not feeling well he stopped chasing the cows and was not interested in the heifers in the next fence. The rancher called the vet who left some medicine for the bull and tight away the bull got after the cows, jumped the fence to get at the heifers and nothing on four legs was safe from him!! A couple weeks later the two met again and the other kid said their bull was feeling pinkish. What was the medicine called the wet left for the bull. Bill sapid he did not know what it was called but it tasted just like licorice!!!!

Best regards and all,
Paul H.
