

**Del. medical examiner  
improved health care**

I have known Dr. Ali Hameli professionally for almost all of the years he has been in Delaware. I have always admired his integrity, his ability and his energy.

The Delaware public knows of Dr. Hameli's professional reputation as a skilled forensic pathologist with both national and international acclaim. There is another aspect of his work which is not generally known. Because he is interested in the problems of good medical care and of practical training of physicians who supply that care, Dr. Hameli joined the Delaware Academy of Family Physicians and served actively and well in its education committee. His leadership abilities were recognized, and he was elected president of the Delaware Academy of Family Physicians and, later, of the Medical Society of Delaware.

Dr. Hameli is held in high esteem by all who have worked with him. He has contributed much to the health care of Delaware residents, entirely apart from his official duties as state medical examiner. I am confident that he will be able to clear his name of the charges which have recently been made against him.
