Dear Paul,

As you once remembered and probably will again, years ago I sent you a short memo about what a doctoral candidate learned from some AFL/CIO files I had opened for his study on Veciana.

I've just finished Fonzi's learned treatise on investigating the JFK assassination with imagination and without reference to the crime itself.

I went to my Veciana file to get the memo I sent you to send to "esar and it is not there. I did find a later letter to a Post reporter of which I sent you a copy.

If you can retrieve the first memo I sent you and provide a copy I'll appreciate it. I want it now just for file. I've already mailed Jim what I wrote in which I cite that memo.

About 20% of a lengthy manuscript I wrote under the title HOAX about Posner and his book has been manufactured, without correction of the errors I found in the retyped ,ms. that I picked up again on the proofs and without the corrections I posted on the proofs. Indications are there was a sudden rush. The small volume does not have even a table of contents. However, the Posner content is accurate. When I get what I was told yesterday is being sent me I'll send you a copy. They changed the title to Case Open and managed to give it one subtitle on the cover and a different one on the title page and the copyright page! All this, alas, tends to undermine the solid remains of a much more solid work.

Best to you all,

*Harold*
