Total this order: 235 pages. Good stuff if I must say so myself.

The above-indicated pages numbers have been put lightly on the rear of the top left corner of the GA pages, to indicate the order of the file as received (and, presumably, as previously gone through.) It should be rearranged in correct chronological order, with CD's and CE's removed. (A separate list of all this is removed should be made.) Maybe my previous GA documents (from HW, etc.) should be merged in. A proper subject/~~keyword~~ keyword index is almost essential here.
