Hoover

At the time Hoover had to pay public attention to the Mimutemen, in his 5/19/65 appearance before the House appropriations committee, he had so little good information of his own, apparently from the lack,of attention to the Minitemen, that he had to crib from the writing og J. Harry "ones, then working on his "A Private Army".

Six months earlier, the Washington Post had asled ones to write a special article for it, on the "inutemen. It appeared 11/18/64 (right after a clammor from Congressmen and others because they had feared the _inutemen and the possibility of their involvement in the JFK assassination.

It is this article, almost word for word, that "cover cribbed. On pp. 111-2 of the Collier paperback (revised) edition of this book, Jones' comparison of his writing and moover's statement appears.
