Searches-incomplete records

DeLoach an 94 files not searched

— The Hosty flap and Oswald's potential for violence

Attached, exactly as provided to me, is a page from the 62-109090 file marked as NotRecorded although it is, obviously, incomplete and is apparently the last page of a memo reporting the Housing Director's press conference relating to the Warren "report."

The subject matter is within the DeLoach specialty and to copy his files should be required.

There is much that to a subject report is knowingly misleading and self-serving in this part of a record. For example, the criticism of the Commission for not disclosing all testi copy. The FBI knew the 26 volumes were to be published and for months has had page proofs of same.

That Oswald "has not given any indication of being a violent type of individual" is false and was possible because of the FBI's suppression of the evidence that was then destroyed - Oswald's threatening note to the FBI itself.

My point here is to indicate that while accident can explain the incompleteness it does not explain the FBI's failure to provide the record from other obvious sources and the false and misleading statements of the Director DeLoach previous motive for a non-accidental withholding and a failure to search other files for a complete copy.
