

LJW assassination records appeal

Harold Weisberg 10/14/79

Photographs and their film (Hughes) and tape (Jesus Gere)

FBI control over what would and could be known, including in R.  
Secrecy, internally, and native for withholding

Attached are u2-1074/90-56 and 107. The former relates to a completely unidentifiable  
flight film I identify as the Hughes film, the latter to Shultz's footage and to Jesus  
Gere, not fully identified in the record. He was also public relations director for  
the International Trade "art."

Why the memo to Belmont memo, 456, fails to identify Hughes and reports incompletely  
and in fact misleadingly I leave to your own conjecture. I believe this are the conclusions  
of what I have already told you in the Gere memo are consistent with the control within  
FBIHQ of what would be and could be known in R., including by cover. These address  
native for withholding. Additionally they serve to control the investigation of the  
assassination of the President to eliminate all not consistent with the FBI's pre-  
conceptions so that what was ordained in the first few moments, prior to any investiga-  
tion, would be the unquestioned conclusions. Also native for present withholdings.

The Hughes film does not show anyone in the window at all. The shots were  
fired, despite what this memo implies. It also is not the only such film. Another is  
the Powell film, subject of my 1968 request on the appeal of which you have not acted.  
Still another is one I learned about in the Dallas field office file. It shows two  
images in motion in that window but the FBI said it didn't even show the window. (My  
private information is that only recently has the FBI tried to obtain it and then  
refused a copy when the owner was unwilling to part with the original.)

You confirm what I told you in my previous appeal, that he had gone to APB  
and seen the footage on their "viewela right after Oswald's name was published 11/23/63.  
After that, at 4:00, which was pretty soon, he tel. the FBI, with which he was in  
frequent touch, that the footage was provided to the NBC net. My understanding was  
also that said agency you can conjecture about but it did not relevant information or  
still withheld field office information I requested...I am aware that request have to  
be for existing information, which I believe there is. However, I am also trying to  
provide you with explanations for their withholding - native for withholding.
