

Mr. Jeremy Gunn, ARRB
600 E St., NW, 2d floor
Washington, DC 20530

3/17/96

Dear Jeremy,

Now that the ARRB has deposed Humes and Boswell I would like to read the transcripts of those depositions. I do not want to do this for my own writing. I do not expect to return to that area. I am certain that unless they were asked ~~cream-~~ ^{off} questions there was perjury before the board. If as I believe it will ~~my~~ reading of the transcripts confirms this I will then write the board with details and proofs.

The board has disclosed earlier transcripts of its proceedings and all its records are required by law to be publicly available when it ends its work so I see no problem ~~to~~ ⁱⁿ this for the board.

If the board is unwilling to do this voluntarily then I invoke FOIA.

I regard this as a very serious matter, perhaps the most serious matter that will be before the board.

The board has concerned itself with what are at best peripheral matters. This is not of that character.

Any destruction of any records relating to the ^{assassination} by any agency was in violation of law and regulations without the written permission of the Archives. I have a file drawer of copies of government records stating this in various way if you would like to see them.

There are additional requirements about the preservation of all autopsy records.

On this prior to your deposing him Humes swore in contradiction to himself. Given its materiality I believe this prior testimony was perjurious.

If his testimony to the board was not consistent with his prior testimony then his board testimony is, I believe, also perjurious.

As you may or may not be aware, I have published some of the official proofs of what I say as well as the results of some of the checking.

I also sent Humes and Boswell copies of some of what I refer to above. I heard not a word from either then or since then. I have not had any complaint from either about anything I have published on this or written about them.

I hope to hear from you soon.

Sincerely,

Harold Weisberg
