C.I.A. Connections According to George O'Toole, former head of Problems Analysis Div. of C.I.A. there are several instances where ex- Agency (C.I.A.) personnel went to work for Itek and vice-versa. Within the Agency Itek was known as the In-House Photo Optics outfit. They do a lot of Agency business and all corporate officers for Itek are first cleared with the Agency. As Contract Officer O'Toole had first hand information on which to base his characterization of Itek as a household word known for it's highly developed Photo-Optics.
