Dear Lou,
I've been lsid up with a hich fever. It's departure lesves me weak and sloved down somewat.

I have received the Ph devices, without irdication whether they are repaired or repeirable, without adjusting rods. I heve not yet received the rifle. It would lielp me get the missing clips if you mention them to the Calif boys, who certainly did have them. Without them, it serves no purpose to me.

I heve been eble to cer y the eubject of the letter I wrote on perjury e little Iurther, stecking it up tighter. In telling you this I also tell you that silence will meet silence.

1 have hed on interesting exchange of Iettere with Arcn Sohn. He denies having had anything to do sith bringine Reniater to N.O., saye that there was diegnosed brain demage in Caicego. The diggnosis accuretely forecast deterioretion snd the ensuing behevior. He says the recomrendstion was by Morrison's brother. He slac says his interest is in doing something about crime. " give him these chellenges: do snd sey something about Andrems' procelimed federal prejury ond the federal refusel to do snything about it; what will he do if, independent of your office, $\mathcal{L}$ give him proof of crime (perjury) in N.O. end other crime and wrongdoing in the ares?

I have been fruitfuily ergeged in a line of investigetion thet rekindles interest in the 19106 P.O. of Lee Odurn and the similar number in Osteld's book. If you have enything on this other than wes in the motionr. in court, I'd rery much like to heve it. It holds every promise of being very important.

The Memphis farce vevealled nothing of Ray's ailleged N.O. contact. I presume you al so huve no knowledee. I hava also done some Work on that engle. If you know or suspect who this might heve been, it would be cood to know.

Best regaris,

Harold Wesibarg
