Dear Barb,

I'm glad you have NEVER AGAIN! If you or anyone else wants the index, which is off by a couple of pages after some time in the book, I'll be glad to send a xerox of it if I get a regular envelope addressed with three stamps or if it is wanted not folded, a manilla envelope with four stamps. I think that after I went over the proofs they dropped two pages, one with a picture.

While there is another reason too the real reason I will not be at COPA is that any travel is potentially quite dangerous for me. A piece of outer layer of skin peeled back on my shin last night from a washrag. There are places on my chest I cannot rub with a towel because the skin has peeled back from that. I have to pat myself dry.

The other reason is that there is too much nuttiness there and too many nuts and I want no association with either.

If you know anyone who will get the CIA records ARRB is causing to be disclosed other than the first batch, which I have, I'll be glad to pay for xeroxes. I do not have those <sup>others</sup> disclosed with redactions. My interest is not that of most. I am interested in what those CIA nuts down there were up to. You will not find any of that ~~X~~ in Newman's book. If you find any real connection of Oswald and the CIA in it you'll have seen what I did not. There is much that is factually wrong with it I think you'll not be able to detect. Or that most others can. The factual errors are central in his argument.

When you read NEVER AGAIN! remember it was written in 1992 and sat on. Not by me.

The ARRB is trying to get some Ruby stuff disclosed and that does not interest me. I am not interested in the Giancana stuff they have ordered disclosed by the FBI, either.

Best to you all,

*Harold*

14 August 1995

Dear Harold & Lil,

I am remiss in taking so long to thank you, not only for shipping Post mortem to me, but for signing it as well. It was an unexpected delight that you took the time to autograph it for me!

I have found and purchased Never Again. Sad to say I've only had time to barely crack the cover so far. I am most eager to be able to delve into it and I am hearing very positive things about it from others. Congrats!

Any chance we can talk you into an appearance at COPA this year? It's only two months away - it'll be here fast!

Take care, both of you, and thanks again!

All the best!
