

10/28/88

Dear Bud,

Herewith what I had in my subject file under D.L.Jackson. This does not include my personal notes or an appeal I filed or the covering letter with the transcript of Jackson's memorandum. It was transcribed for me ~~in~~ an official *Dallas* office the identity of which you know but I do not want to disclose.

I've just skimmed these things but they contain what was not reported earlier and they make it clear that Jackson saw Connally hit by the second bullet.

The Chaney comments as reported by the FBI do not include what it had to know he had been taped saying, that he saw the President hit by a shot from the front. My recollection is that he said in the face. As I told you, I have part of this ~~tape~~ tape on a record that anyone interested can listen to. The record was made by the owner of the tape and it is he who gave it to me.

Please note that although Jackson said he saw Connally hit by a second and separate bullet, which is what the FBI also says, it says that what he said is in accord with the Commission's conclusions. It knows better, knows that the Commission went for the single-bullet theory and claims that the second shot missed. On its part, the FBI has yet to admit that any bullet missed or to acknowledge in its own versions that Mague was wounded.

When Gil makes copies of these for you I'll keep a set in my office in the event anyone wants to discuss it with me.

Best

The meddling of the FBI by the Dallas police that led to all of this so many years later is not in the Jackson file. I think it is under DPD, a larger file.
