

CONSPIRACY!

This mailing ends all subscriptions to the newsletter for the time being, and brings everyone up to date on all I have published. I send my love and thanks for the support you have given, and the interest you have shown. Razberry, which printed my articles, and kindly provided me enough copies so you all had one, is now defunct. I am moving out of town, and if another series is possible, you will get it in the mail. This one was horribly delayed by so many things I can't go into it. That it reaches you now is a manifestation of the help and support of others. Here are a few postscripts:

1. Penn Jones, Box 1140, Midlothian, TX 76065 is going to print a newsletter for researchers and the public, including the work of many other investigators, as well as an upcoming article from me on another important "mysterious death", a case where I am claiming priority of paranoia.
2. Colt/Donnelly's excellent Assassination Resource List, which I have enclosed the now dated second issue of, has been revised with a third issue for you serious workers, available from them for a donation. This resource list should, the "Conspiracies Involve..!" box on the reverse to Mae Brussell (whose articles on Watergate deaths and Sirhan's CIA ties appeared in recent Midnight issues). *credit*
3. A post script to my Dan Rather article, left out due to space, reads: The State Department maintains a list of 163 males (their chauvinism will self-extinct them) who are slated to survive a nuclear attack in special bunkers 2 miles underground. The President, the Chiefs of Staff, Cabinet members and others comprise the list. The most important people in the country, in their terms. Dan Rather is on that list.
4. The biggest story of this decade is the hoax of Howard Hughes. He died years ago, having been kidnapped and taken out of power in 1957. Lockheed Nazis, the Hughes Medical Foundation front, and CIA operations division are one and the same. That's why no will, a fake body, the 12 deaths recently in the Lockheed scandal investigation of Japan, etc. Get a copy of Mae Brussell's excellent piece "Is Howard Hughes Dead and Buried Off A Greek Island", and a bibliography to start your own work on Hughes from her at 25620 Via Crotalo, Carmel, Ca. 93921.
- 5-My planned future articles include one linking the sugar industry to the JFK assassination, titled "The Pepsi Generation". Read William Dufty's great book, Sugar Blues and get off white death addiction yourself. Also, I want to show how Watergate and Nixon's fall was carefully set up by the intelligence crew, in a piece titled "All the Post's Men".

I hope I've given you at least a jaundiced eye on the current set of press lies we get fed every day. If so, you've been suspicious of "swine flu" at Ft. Dix, earthquakes in Italy, American Legion's mass-death in Philly, the Chouchilla school bus kidnapping, the death of Martha Mitchell from the same rare cancer that invaded Ted Kennedy's son's leg, CIA reports predicting world famine, Squeaky Fromme's "sugar-daddy" from military intelligence, and Jean Dixon's "prediction" that Ford will be shot in Kansas City. Not to mention the stupidity of Richard Schweiker's conclusion that Castro had Kennedy killed, just before he became a running mate to that fascist Ronald Reagan. The truth is out there, and people want to know it.

John Judge
