

10/9/69- Haiti invasions, indictments for (Ref earlier memo)

Yesterday I dropped in on James O. Morris, of the Internal Security Div, fifth floor, Federal Triangle Bldg., to whom I had earlier been sent by the Criminal Div after the Miami indictments. He had indicated great interest in seeing me, copying my tapes and other files, etc, and had promised me a copy of the indictment. I never got it, never heard further.

He professed surprise at this, and explained it was not him but Customs, to whom he had referred this, because they are in charge of such prosecutions.

He said he'll send me the indictment (he drew it and they made but minor changes.

I told him I had a friend in touch with Dempsey and about to interview him. I said if there were any questions to which they could make an effort made to get answers, I would ask they be asked. He said this would not be evidence. I understood it would be hearsay. I said it might produce knowledge. He agreed. He presumed Dempsey had been permitted to return to Canada from British territory. I told him I had interviewed Dempsey in the Canadian press and he said he thought they had them.

I also told him I had reason to believe (and why) the NSRP was pulling a nasty frame on the FBI (and what it is). He said the place to take that was the FBI, because it involved their reputation. I replied that is the FBI would not even answer a request for my a copy of a press release from me this seemed a futility, and I presumed it would be his division that was interested in the NSRP. He agreed they have such an interest.
