

2/15/97

Mrs. Kathy Weber  
108 Beacon Road  
Bethany, CT 06524

Dear Kathy,

Pretty little girls grow into pretty young ladies and are a delight to the eye to see it happen. We do appreciate your sending the picture of your two, the smaller of whom is much larger than you were the last time I saw you!

What is more important, they look happy, like two well-adjusted young ones.

I've often wondered if I'd have dared do what I've done if I had any children. I am inclined to believe I would not have.

I did hear from the professor last year, I answered his questions and have heard nothing from him since.

I presume having heard nothing from you that you've gotten nothing from the FBI.

In two months we will have accumulated 169 years between the two of us. Hil is about as she was. A year and a half ago a hip replacement was recommended and then the recommendation was changed and she's not had it. I was hospitalized twice since we were last in touch, two weeks locally and the next time they shipped me to John Hopkins for more than three weeks. Congestive heart failure and renal failure plus seven other things on their report to the local doctors.

But I'm still chugging, still working, still increasing the record for our history with no prospect of it doing anything else. My professor friends can't believe an old man can do that much work. Which I guess may be the best medicine. Plus the about 30 pills prescribed daily!

Please remember us to your mother. She is a fine person and we hope the years are kind to her.

Our best,

Harold
