

8/4/75

Dear Jerry Kay,

Robert did tell me about you. He told me that you'd be at law school.

What legal research that can be done not in a rush Jim Lsear will know and ask for. I'll send your letter to him.

Aside from research Jim has need for New York co-counsel but I doubt any professors would be interested or, if they were, have time.

I have yet to see what I regard as a good article in the National Tatler. I do not have the one headlined "These Men Killed JFK" because our local newsstand had sold out by the time I learned of it.

I am expecting to bring Post Mprtem out. If and when I do we'll let all on our mailing list know.

We lost the suit for the spectrographic analyses and the neutron activation testing in a joint effort by a pro-FBI judge and the FBI and DJ to rewrite the entire law, in fact and in concept. We are going to appeal.

To the degree it is possible I'll deal with this in an addition to Post Mortem.

This may very well be the precedent case.

It is one on which there has been total media, legal and "liberal" abdication. In none of the three calendar calls was there a single reporter, even a single spectator.

The Nader people were not interested, not present.

Those self-seekers to whom I addressed myself in the speech I read for me at NYU, despite all the self-serving noises they make, could not find the time to put a single body there.

Including those who for a ten-cent stamp became the beneficiaries, to the degree their intellectual and factual limitations permit, of the work Jim and I did.

If you are going to continue to have an interest in the field and perhaps do something in it you should be aware of these realities, not the puffery you hear and read, both of which are unreal.

Thanks,
