## Dear Mo,

Berore I got too buey and forgot, I muat mate for tho thinges
Pirst to, thank you for the fine thing you did for pe and to say what I know you realise, how much. I apgrooiate its

There in Iitile wall apece in wy ouffico, What now hungs on the wall are four things: four of wy couyrightis, a calendar, what was once tho only personellyowned autographed picicture of Marmah (me mo by his aubaseador - a part of py lif ani activity litite lenown), and an oxieinal etching of Paul Robesom, who 1 Imew in the 30d.

The only erpty apace, windowis, sholves and filing cabintes talcing ap all the reraining space, is behind the dooz, But whon I can aatch up on the large accumitation due to $\bar{y} y$ absnece (and I had to be away yestortay arauin) I wdil., with joy and pride, hang the Media Noricsop award there wntril I cun sowehow conceive a better piace.

The second thing is a request. Will you please give yy thanks to the woman, micnovat to me, who ded the besutifil job of preparing the avaud. She must be either a proies ional or a very girted amat ury for I've seom so many not neevily as attractive.

While I was in vuc thid last txip, wi.th all the other things, I was still able to carry ny invostizations ioward, I think in a sienificantily inportant way. It siay be defficult for you as a lawyer to understand how I can investigate a Memphta crime in Fen York, but I dde; as eventually yom'11 leam. I have a motion you rogard this as a "free James Eaxl Ray" operation. It is not, in any sonsc. The closest scompate concept along those lines is "rty J mes Barl Ray". That La the wey we can acconplish a mumber of I think legitimetus and necessary objeetivegs force a solution to the crine, do what can bo done to roduce the prospects of similar Grines, and espose St. Rdgar the Indtsporstible for what he is.

I think thet it 1 a a logitimatse thine for me to sond ingela Davia a copy of the book for her to study so shr cen use wiat it contains for her deriense. Inheront in it, as the tithe sugeents, shas is the mothocology of Iraming. I understand she is cut off Irom everything Itle this, as othors are and have been. But I also thinisk that the posetion lity of her asdin it in helpence vith her own deembe outal it in a differont category. I'd Itike to do this, at least try it, If you acroe. If you do, can you fall mo how to addrose hem? and if the aithorit-
 doing, if they puruse, I thinic we may add part of a different dimongion to the nature of liex confinement and treetmont. If you disagree, I willi not do $2 t$.

Again, ny thenks. I hope we are together acain noon, and with the figposutilis, a bitt of relared time for comunication.
