OSWALD, THE C.I.A. AND THE WARREN COMMISSION

THE UNANSWERED QUESTIONS

BY

PETER KROSS, Editor, Back Channels Magazine

This new study by the editor of Back Channels magazine, gives the reader an up to date account of the relationship between the CIA, the Warren Commission's investigation of the assassination of President Kennedy, and the man accused of killing JFK, Lee Harvey Oswald. "Oswald, the CIA, and the Warren Commission" is based exclusively on newly released documents that have been freed via the "JFK ACT." The book delves into the areas in which the Warren Commission, in its haste to close up the case, failed to investigate. The book covers not only important events not known or ignored by the Warren Commission, but the people whose story was brushed aside who might have had a material impact in the Commission's final verdict. Among the important new information in this study are the following: The Scelso Document, new information on ZR/RIFLE and the Executive Action Project, QJWIN & WI/ROGUE, the Kennedy administration's two track policy in dealing with the Castro government, Robert Kennedy's extensive hold over the administrations plots to kill Castro, the French Connection, the KGB's Assassination Department, JFK's knowledge of the Castro assassination plots. Also covered are Howard Hunt's secret investigation into the assassination, the Ferrie Flight plan document, and the Oswald-Dallas connection. Anyone interested in the behind the scenes events surrounding the Kennedy assassination, as well as the history of the 1960's should not miss this work.
