Re Kenney memo 4/25: Congratulations' Surgeon General of the Nevy Working at night, unnoted in Sibert-C'Neill, any Warren Commission testimony or evidence! And my correspondence with the Navy on this, their refusal to identify even their Surgeon-General' And Finck didn't know who he was? Entirely inconceivable. He didn't waitmlong after publication .. C material to reture. All the key Navy medical people have then, unless Galloway is still on active dety. Have to learn Helen's present position. She has been silent for a long time. We'd have to give her a cereful list of questions and it might be better not to, let it remain a big question until it is all published at one time, in conext, with all the su pressed evidence that is so overwhelmingly one way. We should think about this. I am no closer to getting back to the writing of PM II, but in thet book, in the context of what I will have there, and in the context of FM and FM III, I think it is more likely he will be willing to say something. Speaking to him now may elect and predispose to lies and obfuscations, while alerting for the contruction of fabrications intended for defense. They have and can get an audience we cannot. But when you add that to Burkley and Galloway, this becomes astoundingly conspiratorial, whether or not susceptible to seamingly in ocent explanation.

Wanted to thank and note this in the few milutes before I leave to pick with up. She is working pest the tex period, we do not know for how long. I'll get to the letter enclosed soon.
