

FBI-King Section 58, Serials 4501-4576 75 docs, 178 pages, tye say, actually 168
These serials appear to be in reverse order and are reviewed as delivered.

4564 Rosen tells DeLoach Hanes "absolutely no good."

4559 refers to attached letter and memorandum to Stephen Pollak, neither attached.
It also refers to Pollak being provided with everything pertinent at AG's request.
This and other such records now provided by FBI strongly indicate non-compliance by
Civil Rights Division- and deliberate non-compliance.

4539 Rosen to DeLoach memo on help to Pollak says it is usual practise to send lab
reports to city of origin, this case Memphis.

illegible serial is 6/17/68 memo to Pollak. Did we get from CRD?

4531 Jones calls Jeremiah O'Leary "a very reliable contact" whose Readers Digest 8/68
article "it would be greatly be to our advantage to have the benefit of reading it and
offering any changes we felt necessary, prior to publication."
Those deletions Digest lawyers felt necessary for fair trial indicated on ms. attached.
O'Leary invents conversations.

Bishop noted "some question about this coming out before the trial" but there is "OK H".
The FBI's cost and effort statistics are the lead in the article.

Note deletion of fact there was no ballistics match. 4-5.

As does the content, so do deletions reflect the FBI. Example, of alleged Ray in-jail
racism, which comes from the FBI's inmate interviews (both ways, not this one way) 13-14.
DeLoach WFOR EYES OF DIRECTOR ONLY" memo of 6/6/68 referred to on 17 not provided.

He was phoned from London at home 7:15 a.m. Wash time 6/8 and told of Sneyd arrest. No
memo provided. No record of any kind. 18

All-points bulletin, p.19, close, not provided.

4528 When Pollak complained "he had not gotten any teletypes, cablegrams or airtels in
connection with the King case other than the one ~~xxx~~ which had been sent concerning the
arraignment of the subject," on June 12, Rosen told DeLoach the FBI could screen these
communications of fact but Hoover ordered that the secrets usually kept from the
rest of the Department be kept from all.

4527 DJ considering getting Britain to deport Ray but decided against it as prejudicing trial
2, graf three one of several statements Vinson made reports we have not been provided, by DJ.
3, graf 1, instead of affidavits, DeLoach wanted to have agents "notarize the Laboratory
reports which had previously been sent to Meestate and which had been included in the
investigative reports." The lab did not give us what it sent to the state. Usual procedure
DeLoach says, as Rrazier testified on deposition.

Deportation-nix-more bottom 3.

4-Hoover's note saying NYTimes has no friends in FBI
