I could continue this much honger and for those of you so desiring will. My purposes are to inform and to release without restriction what little the FBI has provided of what the law requires it to provide. Let me close with what Tyler says is the spectrogroagic analysis on the King clothing, dated April 8, 1964.

This gets back to the Francisco perjury about a single bullet wound so essential to the faked solution to the crime, to framing Ray and to the real reason for suppressing exculpatory evidence to which the defense was entitled.

The alternative would be truthful, that the still suppressed evidence proves Ray did not commit the crime because with the remnant of bullet science makes the "association" possible.

Then we have alisting of the clothing-with but a single one of the mine identified components of the alleged fatal bullet, indeed. Withouthixe the other known components, without a single figure in measurement.

Then a sketch of the jacket through which the exploding fragments burst.

Plus the location of three different places from which "spectro samples" were taken - for the entirely missing spectrographic results.

Next what was known and suppressed about the second bullet wound, proof that the tie was literally tirn apart and off by the force of the outward explosion, with samples for snalysis - the same missing analysis- take from each of the ruptured edges

Even the neckbanf and short collar were torn in a coinciding place by the vio; ence of the explosion about which Dr. Francisco committed the indispensible perjury.

This is proof that the FBI and all those sanctimonous Department of Justice lawyers have protected by their silence.

Remember, these papers came to me from the Deputy Attorney General of the United States.

Just when the new Attorney general has announced a "new look" at this crime and doing something his Departments' and the FBI's improper acts -two years after the order.
