

dear paul,

12/7/76

there appears to be no end to what the lane-freed ripoff associates will rip off.

you may recall that there was a time when freed was trying to get me to give away all my rights for vague pie in the sky on a movie. his idea was not a good one. he accepted my reformation into a first-person account, based on what i had done and including more, like jim/

he and lane have now stolen even that from what i learned yesterday from a reporter.

freed is doing a movie called The Investigator in which lane does what he did not do and i did.

i do not know whether any of this gang talks to you or whether you have time to talk to them but i sure would like to know all i can about their dirty-works, harmful to more than me personally.

freed's dealings with me are amply recorded.

the more important need is to prevent this wontinging harm which the indecent care nothing about as long as they receive attention and synthetic fame. next there may be a need to sue. in the latter event it would be good to know if you know a good lawyer experienced in this kind of law or can learn of one.

if as i omnce asked i could learn those who insure movies- freed once told me that only three firms do p - that might be a beginning point.

best,
