

Dear Dave,

1/3/78

Lane has an article titled "The Mysterious Death of a Key JFK Witness/" in an issue of Gallery of several months ago. Gallery does not give the month with the name on the inside pages. I read this crap several days ago.

I think you might want to write him and ask him to cite his seemingly impressive sources or better yet, the CCI being entirely non-profit and impersonal, that he provide you with copies of all the cited records. You would not get what the piece says.

In fact there is not much that it does say about the JFK assassination. It has a variation of the "baby-sitter" role for DeMohrenschildt. He moved Oswald into place. This is what Lane actually says. DeM. got Oswald the job that long in advance to move him in place. Oswald could not get around on his own only to USSR and back - so he had to be helped to Dallas and around there.

DeM is one of the fable CIA operatives, one would also gather.

This is a fine example of Lane at his unscrupulous best, dealing with non-fact with illogic and without reason.

At no point does he say why his prior white hope Garrison did nothing with deM. And, of course, Oltmans can't be questioned.

Best,
