FBI clippins file, King-Ray

First stories do report Hanes was to consider representing Hay only if returned to U.S.

It is clear that leaking was systematic. After going over the FBI's files it is apparent that it let out all it gathered that was prejudicial to Ray. This would make a worthwhile separate study. It is the kind of operation that fabricates guilt in advance of an opportunity for the system of justice to work. Or, it circumvents the system of justice - really controls it.

Even Scotland ^Yard joined in. June 13, 1968 UPI's John Meehan wrote that "according to Scotland Yard sources" Ray "hurried off to Lisbon to pick up some money transferred from a Swise bank account."

His letters possessed by the FBI and relating to his efforts to get to Africa were leaked. So was his supposed prison psychiatric record. "Naw Rhodesin Query by Ray Recalled" the New York Times headlined June 13,1968

How easy it was for Ray to get out of Canada is reported in the Buffale Evening News of June 11:"Standard Fugitive Kit Costs \$15 in Toronto - and No Sweat." The lead under this headline said that "For less than \$15 James Eark Ray bought himself the standard fugitive kit - a passport and two phoney birth certificates."

FBI supposedly secret evidenceleaked to Drew Fearson and "ack Anderson is filed in the teletype of their colum for May 16. Not the printed versions - the copy that goes to editors only. Supposedly.

Martin Waldron was told, in the words of the New York "imes' headline of April 12, "Fatal Aing Bullet Heported Too Small to Identify." This was before the filing of the ballistics reports by the FBI lab. His story was written the day before.

The plans of t e young for memorials are all preserved, some from the news tickers amrked for Clyde olson's personal attention. The FBI never forgot what its founding father thought of Dr. King.

With all that was clipped and pre served, all that was obtained outside of normal channels, the FBI's interest in the crime was so great it did not keep the local papers and their longer stories by those who knew the local scene. Editorials praising the FBI are translated in duplicate from a Puerto Rican paper but there is nothing from the "emphis papers. Not even the pictures they published, prime evidence. These are undoubtedly in the local FBI office but they are not in the Headquarters file.
