

JFK'S BRAIN

WHAT'S THE TRUTH ABOUT JFK'S ASSASSINATION? The people of Amerika have been asking this question for ten years and still haven't received an adequate answer. Many have grown impatient waiting for their elected representatives to force the power structure to objectively investigate itself and have decided to personally petition the government to re-open the case. They'll be gathering in front of the National Archives in Washington D.C. on Nov. 23, 1973 at 1PM to demand The Archives be open to researchers of all persuasions who want to see if the evidence in it backs up the conclusions of the Warren Commission. The demonstrators will also demand that all evidence being held by the Kennedy Clan and by Bethesda Naval Hospital be returned to the Archives immediately.

- The rally will be addressed by the following people:

Mae Brussell - whose extensive research has uncovered links between Watergate and Dallas and whose West Coast Radio Program and widely reprinted articles have enlightened many. Mae is the ultimate assassinationologist.

Don Freed - author of EXECUTIVE ACTION (Movie & Book), co-author of THE GLASSHOUSE TAPES in which ex-Red Squader Louis Tackwood links McCord and Hunt to a plan for a Nixon coup d'etat. Greatest investigative radical writer in Amerika.

Carl Oglesby - ex-President of SDS, Vanguard recording star and radical theorist responsible for the Yankees-Cowboys Double Agent theory of Watergate which has received wide acceptance in radical circles.

Mark Lane - former New York City Councilman, Marguerite Oswald's lawyer at Warren Commission Hearings, author of RUSH TO JUDGEMENT (Movie & Book about Warren Comm. Coverup) and currently attorney for Indians arrested at Wounded Knee.

Sherman Skolnick - independent researcher whose work led to the conviction of Otto Kerner, former Governor of Illinois. Sherman also discovered links between Nixon and the death of Dorothy Hunt and others in a suspicious plane crash. He'll rap about Albert Bolden, black Secret Service agent imprisoned for trying to tell the truth about the JFK-killing to the Warren Commission.

Theodore Charach --writer of movie **SECOND GUN** will talk about links between
RFK-killing & JFK-killing

The main theme of the event will be **WHERE IS KENNEDY'S BRAIN....it seems** that when Dr. Cyril Wecht, one of the countries leading experts on violent death, was finally allowed to examine the autopsy evidence (the Warren Report allows specialists to examine some of the material starting in 1972 -everyone else must wait 100 years because of National Security reasons- we know what those words really mean from Watergate) the Doctor discovered that one of the X-rays revealed a bullet fragment lodged in JFK's brain. This confirmed what many people have seen in the Zapruder film; Kennedy getting his brains blown out from a bullet fired in front of him which proves there were several people involved in the murder. (The Zapruder film will be projected on the walls of the Archives by The Assassination Information Bureau of Boston and they'll be special showings -free- of EXECUTIVE ACTION and THE SECOND GUN--location will be announced at demo) But when the good Doctor tried to find JFK's brain he found it was missing.....

When I heard the brain was missing I immediately thought of Nixon who is suspected of tampering with the Whitehouse Tapes and figured he had the brain in his den, in between his stuffed moose & fish. Actually, the brain is probably in Bethesda, where it's his by fiat, since he's commander & chief of the Armed Forces. No matter, we want it returned and plan to make our feelings known after which we'll march to Congress where we'll demand GERALD FORD CONFIRMATION BE HELD-UP until we find out if the Warren Commission, which he was a leading member of was a cover-up....
