

Lattimer-KHJ 1/24/72, Art Kevin

In describing rear neck wound he never mentions scorching. On the front wound, "no longer visible as such".

Two bullet holes in front of shirt and this is where bullet came out.

Only evidence not other direction is inclination. Describes "true location" as "very low in the neck." So he can't "reason" I went front to back.

How does this stuff assure LHO is lone assassin. Switches to experiments "I have done at some length". Describes them as "merely observations of fact". When you get to who fired the rifles, you have to get the data provided by the Warren Commission, which he accepts without question, this he validates no more than what he had never questioned. "Nobody has challenged in fact", then "not even the most vigorous critics" challenge the basic story.

Doesn't know of parafin test which shows no handling of rifle. Handprints on gun proof.

If shot higher, how could it have had same history?

Whether more fragments were recovered than missing from 399, "I can speak to that", from his experiments! Squeezing and slicing! Therefore, because only six can be accounted for by him, it is possible because he shaved off 41 in the lab.

Back brace. Changed to didn't slump down because of brace. Evaded when asked again. Said only "conceivable" that it kept him upright so he could be hit.

Connally "reacted more quickly than the President to whatever hit him."

Connally's not knowing of wrist and leg wounds indicates he was unconscious.

- He interprets Z movie to show Jackie got up to let press lay down.

RHJ - Krum interview 1/24/72

Assumes he saw all but has no way of knowing except that members agree none of previous et al. correct.

Best inquiries but were from self + panel as pathologists

Said every thing in list of John + what Pamela saw

Saw bullets + fragments which he said are not restricted

Front neck wound - showed that it applied to him in front. "bullet hole" - several things showed that it happened with front, air, prop + in line

"The front wound is no longer visible as such"

"On the front in the front are two bullet holes - that is holes where the bullet came out"

"Does it irrefutably prove that it is the only way" - back to front. Answer by indication of "his track". He found wound much longer than he had indicated.

So he went down it went other way

"How do you show the one to the other - then how do you go to the other proved by the witness testimony - v.e. rest from what he saw + said. Says nobody has challenged that bullets all fired from that rifle. So he says the VC was right because he says it was right

Except how VC could be right if that was higher in back of neck

Talks of

His only source is "to remember the WC
Pact" says sound but J.F.P. in need
says his own experience on 399 equivalent
when asked about missing payments.

He found 4 pops in normally X-ray - facts
of number of pops rather than their
weight because he could share metal
Back here - "impossible he did not drop
down" - not white to "race - it was typical of
black here. Essence of his old story
of BC delayed next in "he reacted more quickly
than the President" says normally less
in answer, rather than nerves blocked
He thinks public got up to of FIR could lay down
