National Public Radio, atta: Program Librarian, Audio Amohive 2025 A St., NW Wash.,D.G. 20036

Dear Librarian,

While you clearly are not the one to address, the response to my telephone request for a tape of Dr. Luttimer's Press Club breadcast and for fairness-dectrine time for response gives as only your mane and a schedule of prices. I would appreciate your prempt referral to the preper person because I want to respond premptly.

I phenod WETL-FR after the breadcast, was referred to Er. John Relford and was told that Deborah Baker Hall would send my the forms for making this request afficially. It is my understanding that under the fairness doctrine the request must be made of a station. I have not this prerequisite.

The entirely different form I was sent stipulates a delay of six weeks. This is clearly inapprepriate with a fairness-dectrine request. I would like this as fast as possible. I will be making a similar request of the National Press Tub in the hope that it also will be fair. I therefore heed what Dr. Dattimer said to the club and on your nationaide breakesst. I am well aware of what Dr. Lattimer mays in general. I addressed it and him in my ment recent (of seven) books on the assessinations, Post Marton.

I beddeve I am uniquely qualified to respond to Dr. Lattimer under the destrime because I alone of these who do not agree with the Varron Report have under an extensive personal investigation of the avidance Dr. Lattimer misrepresents, bringing to light by personal investigation and a series of Freedom of Information and to what he and the Commission suppressed and misrepresent. In these suits the Department of Justice has cartified to a federal court that I know more about the JNK assessisation and the FRI's investigation than sayone in the FRI. I have devoted 13 of the most intensive years to this inquiry. I have slides also. This include the suppressed efficial evidence and seems of the fruit of the enguing litigation. There are three current suits in federal district court is Vashington. I believe I have further and unique credentials on profiteely Br. Lattimer's topic in the federal appeals court July decision in father of me, No. 75-2021. It held that what I seek serves not only ny interest but that of the nation. If you'd like a copy I'll be gled to provide it. his decision is without precedent.

Unlike others who receive attention in this field my work is based on efficial records. I have published more pages of these in facusaile than any author has published in text. I am a former investigative reporter, Senate investigator and intelligence analyst. I believe these also are unique credentials in this field, credentials no other person who might be granted fairness-dectrine time has.

I would appreciate it if you would supply the tape in casestte form. I will pay your charge if there is one. It is my understanding that under the doctrine there is ness.

I think you and the Press Club should both be aware of the timing of the presentation of a partison on a controversial subject in which in the best possible interpretation his work has been extremely limited. It coincides with the opening of the new House inquiry. It therefore assumes to a coloring of the sinds of most reporters and all these who heard the presentation. This, I believe, is quite prejudicial. The Press Club may not have been aware of this or had the intent. It is, however, the fact.

Sincerely

bareld Weisberg

Pres ident National Press Club 14 and F Sts., NV Washington, D.C.

Dear Mir.

In the enclosed carbon of my letter to Mational Public Radio I repeat my earlier request for fairness-dectring time to respond to its breadcast of your this week's speaker, Dr. Lattimer. I hope you will see fit to be fair and present a view other than that of Dr. Lattimer, who speake for the efficial position on one part of the JFK assessination. I do make this request of you, for an equal epportunity and under the same circumstances and conditions.

In my letter to SPR I set forth what I believe are unique oredentials in this field. I believe they qualify me as no others are qualified to respond by breadquest and to inform your numbers and their guests.

As a reporter you may be interest in knowing that one of my many suits under FOIA for the kind of evidence Dr. Lattimer does not present was cited by the Congress as the first of four suits and decisions requiring the 1974 amendments to FOIA. For reporters I believe this litigation is a fair representation of what is unique in my work. To obtain this withheld official evidence and in this one case I have been before two district courts, the second one new for the account time on remand; I have been to the appeals court three times, the last winning a sweeping reversal; and to the Supreme Court. The appeals court has ruled that I "must" take first-person testimeny and that this serves the nutional interest. It has ruled that I sugh do this withferest FIII agents who retired at ages less them mine, estacting with my litigation and in unhidden effort to avoid giving testimeny. By lavyer believes that taking testimeny in a civil action from retired FIII agents claimed by the government not to be subject to the compelling of testimeny is also without procedent.

I hope you can agree that when what I have sought since 1966 in these efforts is no more than the results of tests of non-secret nature there is no reason to believe they support the efficial story. If they did I'm sure they'd have been released long age, with every effort made to attract naxious attention to them. However, there has been a benefit from this efficial suppression. It forced so to make other investigations that produced other efficial evidence that had been suppressed and I believe is irrefutable. I have enough of this on slides. I can provide copies for these of your sembers who would like the actual decuments. Among these I consider relevant to what Dr. Lattimer said and did not may are the forwerly suppressed PBI lab reports, the death certificate which the Warren Counission did not have, and the report of a secretly-convened panel of exports who interpreted the autopsy material other than Dr. Lattimer does.

By files, which are quite extensive, are to become a university archive. They centain much I believe is of current news interest and for the most part are available to reperture. For its archival value I would appreciate knowing who arranged for Dr. lattimer's appearance to coincide with the first acetings of the new House consistee and shy no other view was presented with it.

If you would care to inquire into my credentials I will be glad to cooperate. You have members who know me and my work,

Sincerely.
