Dear Jau,

Your mailing of <u>Outsier</u> 12, of copies you were to have propered for me of discovery materials, has just arrived. I have just returned from our mailbox, 12:20 p.m. 11/16/74 with it. I also asked bil to examine it before I touched it other than to carry it to the house.

This mailing also has been epened.

I am preserving the puckage as I received it except that I have scienced off the top to gain access.

Obviously, when I needed this documentation to do what I had to do and because of this intrusion could not have for the hearing, this becomes more than just another of the many intrusions into my mail.

I will attach a carbon of this to that envelope.

New jayous I am that we have colleagues of stout heart only

It had been agreed that we would begin the recent hearing with a metien on this and related as ters.

Trulys there is no substitutute for courage.

Or deeply -felt principle.

Sincerely,
