Dear Jim,

Thanks for the story on Kay's book and his pointless interview.

I'm sorry you have been silent about the statement I sent you to be given to the appropriate committees. I spoke to you before taking the time to do it and after I finished it and you said you'd do it the week after that second conversation.

I did not take that time at this point in my life intending for it to be wasted.

likewise, if copies were delivered, I have come on more that is pertinent and do not know if or where I should send it.

Will you please let me know?

Dave tells me you are staging a press conference for Grenshaw.

Rocks in your head would be better than what this represents!

If you have not learned that you can't safely take the word of these Texas nuts for anything at all you can't learn.

And utterly destroying what Grenshaw said is easy!

Don't you check anything out with other than nuts?

You and AARC can be seriously embarrassed by this utter stupidity.

And alas deserve to be!

I was wrong in thinking that I'd ~~purged~~ <sup>purged</sup> all that silliness from you.

The Dallas doctors were wrong in JAMA but that won't help you. Five placed him in the emergency room before the Commission.

Tending the IV bags! A nurse's job!

You've made and earned a good reputation and you sully it with this rabidity?

To ruin the good you could accomplish if you had not included him!

Harold
