

Dear ^Uin,

2/7/94

Thanks for your 1/31, here today, and the enclosures.

The McMillan records are interesting. Odd that none refer to her book and what she did on it. Or on her Oswald interview and any questions they asked her.

It seems that of the grades on their evaluation she, she was the highest.

I suppose these are domestic contact records?

OO as used by the CIA is new to me.

I'll be glad to get ^{Barbara} the Newman interview. I'm surprised that she perceived Posner's motive and that they'll not use it.

I do not know or know of her.

Costello's is much better than most.

Dave told me of your conversation, the approach for a book made to you and his suggestion. I like what he suggested very ^{much}. It is new, different and provides a real opportunity to fill the public record out significantly.

As the college kids used to ask, if they have nothing to hide, why do they hide so much? Good title except it is too long.

How about The JFK Assassination: Making the System Work.

Case Open went to the copy editor last week. I doubt anything will be added and more than half was eliminated. Entirely. Full chapters.

If the Anderson April show has anything on Posner, hope you'll get a transcript.

By the way, the Lipel flap was discussed by the ESCA panel.

Thanks,

Harold
