Through Alberto Fowler, tho is hospitalined with infectious hepatitis, I festerdaylocated Douglas Lethbridge (unlisted phone, 866-7308; 3142 State St. Drive), Bay of Pigs veteran, fomer Castro associate and official. Until recently Lethdridge worked for thecompany. His present empleyer is Bonnett's. He and his
wife drove to the motel at ny invitation and dined withre. Nowing they were ovaing, I invited im Alcook to $j$ in us. Me ohatted after dinner in $j y$ roon and taped it. We wandered and, I think, got the opportunity to explore his beokground and knowledge. I think he knows the compant well. Heverything he said atacks up uith what I knew about it. I am confident he will be as cooperative as he can be and will holp in very way possible. Partly before $\mathrm{J}_{\mathrm{in}}$ loft and partly after bo did, hen HIs. Ann Lethbridge joined us and I took them to the bar for a nightcap (we parted company 2 a.m.), he agreed to onlist others of his former colleagues tio arie with us, including by the conduct of investigations in ouch places as Miami.

He has a fasoinating, inside stoxy of the oxigin and sposnorship of Haynes Johuson's book, the Bay of Figa (Bobly K) that Jinm knows. Bobby put up the oney, so the tuff from the four sources, and Johnson got paid a fee for the writing. Lethbridge regard it as a vary dish nect book, a bit of propgunda.

He father emigrated to Cuba from Louisville (I recall Alberto identifying the father as a Canadian), began faming nert to Fidel Castro's father. Leth. andCastro knew ach other well. Le had a number of important posts; partly becauze he isalinguist (Inglish, Spanish, French, Portugese, etc.) and, apparently, partiy because Castro tiusted him and partly because he had considerable knowledge of arms. He is apilot. He has interesting stories about Castro. Heis stateless and somemhat apprehensive about it. Although he has applied for UScitimenship; he seems not to expect it soon, apparently because he thinks he was marked lousy wy the imy igration authorities when he dereoted.

Ho plans a book. While there na bothing in it with which I might disagree, I stronely encouraged him to write it, to completo his notes and rapidyy
 Circle Brench)inHashington. thile makingit clear I couldnot five him ang guarantees; Itoldhim there were sone things I might be ablo to do to help hin and offered to. I so intend, if he takes me up.

He is an expert on the atterpta to assamsinate Castro but knowanothing of the Guantanamo one.

He is tall, atraightfoward, articulate, quite intelligont, I an confidont serious and of honorable intent and yorting of tsust. There are many tings hecannotsay because of ini oath under thenational-cecurity act. Thoze are many things he can aaymadie is faniliar with people, acts, plana, ovontr, atc.

Obvioudly, he has the best connection: with the Cuban groups, with which he has had actual experience. Hefoan indentify the sourses of funds from which payments were made, by account number. Hefisfn our side, having decided independently that the official account of the assassination wasimpossible. Hogave us quite a disertationon the organization that was required to pull it off, on the kinds $\rho f$ weapons that would have been required, offthepumber of really expert marksmen required (nothess than three and possibly more).

I strongly encourage you to get to know Doug. I believe he can be and will be helpful in many ways and that he can tap other help. He impresses me atrongly and favorably.

Louis has the tapes.
There are several small things F have asked of him that $\mathcal{A}$ will be in touch withlim Alcookpbout (I also introduced himrto Louis $I_{\text {vo }}$, who happened to be in the coffee chop on other business et that tine). Oneor these ia a chock or Berths (correct proncuncietion, Rex -mE, with an sound, aw some

Did not reirgige pities of tall, than o, Seyprow, or.
