

July 5, 1990

To whom it may concern:

I have been interested in the Kennedy assassination since it happened in 1963. Recently I obtained a copy of the Zapruder film. I had seen it before a few times but never had a chance to watch it repeatedly. Please let me emphasize that this is not a prank letter and it is written in all sincerity.

After reading Robert Groden's, High Treason, I was stunned when I realized that on page 184, there is some information stating that several doctors who had seen Kennedy's head wound at Parkland felt that he had been shot at close range with a high velocity handgun. With this in mind I searched the Zapruder film for some kind of clue or something. I was about to give up and leave the mystery of this murder to eternity when all of a sudden there it was. I saw the man who killed the President. This is going to sound ridiculous and off the wall but if you watch the Zapruder film and watch the driver at frame 313 you will also see who ~~KIX~~ killed John F. Kennedy. It was the driver, William R. Greer. At frame 313 the driver turns to his right and fires a .45 with his left hand. He holds it close to his face and it is real quick but there is no doubt in my mind. In all the books I've read on the subject there is reference to Greer turning around twice during the shooting. The first time he turns around Kennedy has already been hit and is struggling. Greer could have sped off and saved his life. The second time he turns around is at frame 313 when Kennedy is hit in the head. Of course, Greer fired the shot that killed Kennedy at frame 313. In Robert Sam Anson's book, They've killed the President, there is a photograph of frame 313. In this photo you can see Greer pointing a .45 at the President.

I became extremely ill both physically and emotionally for several days after I saw this on the film. There was a massive government cover-up. David Lifton is on the right track. The Secret Service was in control of the body from the word go. Clint Hill, William R. Greer, and Roy Kellerman took the body by force from Parkland. The same three were with the body on the plane. The same three took the body in an unmarked hearse to the back entrance of Bethesda. When the shooting began, an order was given to the agents not to move. Clint Hill stares at the President as the President is clearly struggling. Kellerman who is sitting shotgun does nothing. Greer turns around and sees Kennedy struggling and does nothing.

Please take a closer look at the Zapruder film. I obviously cannot sign this letter but it is extremely valid and what I have seen on the Zapruder film is a definite key to the enigma of the John Kennedy murder. Watch the driver at frame 313. If you cannot see him fire a weapon at the exact instant that Kennedy's head explodes then I must be imagining this. It's there on the film. William R. Greer is the man who murdered John Kennedy. There is no doubt in my mind about this.
