Ar. Marvin Greens Loeb and Loeb One Wilshire Suilding, 16th floor Wilshire Sivd. at Grand Ave. Los Angelas, Ca. 90017

Dear Mr. Greene.

199

कर दिन

I as writing your client, Dr. Mark Freeman, through you, Me counsel.

At the time you wrote Bernard Fensterwald, Jr., in Washington last February 17 he was chief counsel to James Karl Ray. I was ascociated with that once as the investigator. I conducted the investigations leading to the habeas corpus petition and for the evidentiary hearing. I am still seeking to help "r. May obtain a trial and his freedom. I am also writing a book, my second on this case. The first was published in early 1971. I also have the Department of Justice in court under a Freedom of Information complaint, my second against it on this subject. The first ended with a summary judgement in my favor. At the time you wrote Hr. Functerwald there was no doubt in my mind that all of the evidence shows Hr. Hay did not first the shot that killed Dr. Ming. There is none now after my examination of thousands of pages of the Department's files.

Prior to that time Dr. Pressan had spoken freely to the Fal and to a number of writers. Gerold Frank and George McKillan quote Dr. Pressan at some length in comment on Mr. Hay as his patient. Here than a year ago and before you wrote Mr. Feasternald denying Mr. May's then counsel Mr. Hey's records for use in his own defense Dr. Freeman had spent some time discussing his former patient with John Crowdson of the New York "ince. In fact "r. Grewdson came to see me and engaged me thereafter in long phone conversations about this came and about Mr. Ray as I know him. (I have spent more time alone with his them any member of his family or any of his counsel since his arrest.)

I am not trained in matters of the mind. I am a former Senate investigator and former intelligence analyst. However, from my experiences of almost 54 years, from all this time with him and much with his family and former associates and from a longity and continuing correspondence with Sr. Ray I have formed a layman's estimate of his emptional makeup. I did not violate confidence in conveying this to Mr.Crewdeen.

It may interest you and Dr. Freeman to know that the night he maw Dr. Freeman Mr. Crewdson phoned me from California in some excitement. "e told me that Dr. Freeman's professional opinion coincided exactly with what I had told him.

You and Dr. Freeman are probably masse that the Department has just released the recults of its fourth internal ro-investigation, meaning self-investigation. Each just happens to coincide in time with my work on the case at various stages. You may not be aware of what it attributes to Dr. Freeman, the professional coincen that his examination shows Hr. Hay to have been psychotic and fully capable of this horrible orime. This is exactly opposite what Hr. Grewdson told me Dr. Freeman told him. In all other aspects the totality of dishonasty and false representation in this document exceed anything within my not inconsiderable experience in such matters. The FMI and certain Divisions of the Department are really on trial and the entire machinery has rallied to the common defense. To give you as a lawyer and Dr. Freeman as a human an example there were two weeks of the evidentiary hearing. Mr. Hay was a voluntary witness subject to and subjected to crossexamination. Not this report makes no reference to it and lies in stating that  $B_T$ . Hay's most recent statement to it is the hearsay (and inaccurate at that) of an earlier report by a newsphermen. In that hearing all the allogations against  $B_T$ . Ray were addressed by the defense and not rebutted by the State. They are emitted in this report. I have no pruriant interest in anything Dr. Freeman may have learned about Mr. Ray. I'd be surprised, in fact, if Mr. May told Dr. Freeman what I know about his personal life of the past as it was volunteered to so by those with personal knowledge. I did conduct the best investigation I could and I have tried to understand the man himself so I could better help counsel and him.

3

er dela

My writing is consistent with my balief, that these personal details are irrelevant. In the course of my work on the JPE assassination I set and for four days was the house guest of one of the wesen whose mans and association were reported about a year ago. That was in 1968. Bo I have to tell you what the occurrence value of this was then or that I from my newspapering days was max aware of it?

Even Mr. Fenstervald is unaware of what I have learned about Mr. Hay's personal life as I have learned of it. Of Mr. Ray's councel the only one to whom I have mentioned it is James M. Losar, who also had no interest in it and therefore no knowledge because I did not tell him.

If there is enything of a sexual nature in Dr. Freeman's records I have no interest in it onless in Dr. Freeman's professional opinion it is scatching I should know in Hr. Hay's interest. I as interested and I am asking for these records Dr. Freeman has made available to others, to other writers and to these who prosecuted Br. May. I say these who have from the first framed his and continue to. I am particularly interested in it because the Department has made the statement cited above and attributed it to Dr. Freeman and because of what I can perceive as the result of the unique nature of Hr. Ray's confinement. To may well be the American who has spent most time in solitary confinement that was not the punishment for in-jail offenses.

It may interest "r. Freeman to know that he spent eight months in a steel and concrete walt under strong lights and constant closed-circuit TV. He spent several years in death row when there was no death centence, in a cell in which he could not take three steps. He had a 10-watt bulb for illumination. He was not allowed exercise outside and his food was slipped into the cell.

One of Sr. Ray's hangups is what he calls Shrinks. He happe payohistrists and psychologists and at least since 19/1 has trusted none of either profession. I know this from his 1971 refusal to be studied by a fine Mayo clinical psychologist I know. I then fearwed what the "spartment has just done as well as the consequences of the conditions of his confinement. I therefore will not ask for his permission. However, I do have his release to the Department of Justice for it to give se all otherwise immus and personal records relating to him. If you so desire Kr. Lesar will provide a copy. I also will not ask His. Bay because in my belief some of his behavior has become irrational. He is a lemming. Ar. Lesar is his only crisical counsel. Aside from our sollaboration in the "ay defense all possibilities of which are not by any means exhausted Mr. Lesar represents me in theme FOLA satters including the current suits against the Department.

If you so desire write Mr. Lesar. Mis address is 1231 4 Street, 30, Mashington, D.C. 20024. I am sending him a carbon of this letter.

Whatever his reasons Dr. Freeman has given his records to Fr. Hay's encades. I do hope he will now, if belatedly, make them available in Mr. Hay's interest and in the interest of helping establish the truth about this terrible crime and the incredible official dishonesties and worse. Iou and Dr. Freeman have all assurances that there will be no improper use acds of anything. I must also be forthright and tell you both that if this is now denied in Mr. Ray's interest I will have no choice but to report it in my book, which is entirely independent of Mr. Hay.

Sincerely,

Earold Weisberg

## Dear "in,

-32

manifice

I finally got around to writing Dr. Presson.

I decided to do it through the lawyer who told Bud to go to hull. "newitably Freeman would have consulted his anyway. This gives the lawyer time to think it over first.

I cuitted the fact that "rank showed Freesan the FBI report on what he told them. If they turn we down please rexind no of this and I will write them that, too.

There is no real need for this for my writing. What I got from Crowdson is more than enough after the CPR job.

In the end I'll got it from the Yal anyway. But I want it for you now and for my added understanding in Jimay's interest now.

You have a mome on what Grewdson told no Freeman told him. It is such nore than I tell Greene. It is that as of the times he may Jimy be would have considered him en-

I have taken this time to be as fair as possible to Fracman. You know very well that neither the FEI nor Frank nor Schillan nor Grewdson had a release from Ray.

If there will be more punch in the writing and consistency added to the dostrine if they term me down I have tried to be persuantwe.

I don't recember for ours but I think they picked Freeman up through the records of Ray's phone calls they obtained without subposed.

The chain then probably goes to Canale and from him or his to Frank and then to sverybody after Frank's book was out.

I can understand that Freeman sight have considered he had to talk to the FRI but the fact is he should not have and now that he did is grossly and deliberately sizes. Freeman knew that when he turned had down. What he did is that and I's sure he and Greene knew it.

After talking to all of "ay's energies!

Best,
