

6/15/75

Dear Mrs. Moskowitz,

When I can print Post Mortem or any other book I will let everyone who has been in touch with me and has let me know of any change in address know.

I did not print Oswald in New Orleans and do not believe it will ever be reprinted. I can't do it. If I could Post Mortem would be out.

"The Scavengers is a fake job by the real scavengers. What they were told in confidence they used in violation of confidence and then edited the tapes to make them say exactly the opposite of what the authors had been told. Two more wretched men I have never met. The book is unworthy of any serious consideration.

I have obtained some of the suppressed spectrographic and neutron-activation tests but far from all and am still in court on this.

In fairness to the man who is responsible for this success to date I should let you know that Bud Fensterwald messed the first suit up terribly and has nothing to do with this one. Jim Lesar, who had not yet taken his bars when he started trying to undo this mess, is handling it entirely himself. He can't be praised highly enough. And despite what you may hear and read, he has been doing virtually all of the legal work in the Ray case while the older lawyers who do nothing and do make problems in this defense hog the public credit. Jim handled for me all the other little-known successes of which obtaining the suppressed transcripts are only part. I'm making it all publicly available in whatever ways I can, either by just giving it to the press or by incorporation in other works.

Sincerely,

June 10, 1975.

Dear Mr. Weisberg:

I am truly sorry that I sent the incorrect amt. of money for the 4 books I recently ordered. Enclosed is the additional \$4.15 which I owe. I hope you won't forget to let me know if and when the Post Mortem series become available. Also will "Oswald in New Orleans" be available again, even tho it is now out of print?

As I was looking at the library for books concerning the J.F.K. assassination, I came across a book which purports to be an "unbiased" study of the critics of the Warren report. (you can ascertain how unbiased it is by the title, "The Scavengers and Critics of the Warren Report"). It is by Richard Warren Lewis and Lawrence Shiller and it includes you (as I am sure you know). I was wondering if you had any personal comment on the book and/or the authors? (over)

Have you obtained any of the
suppressed spectrographic information
as of this date?

I wish you and Mr. Fensterwald
much luck.

Sincerely,
Helen Moskowitz
